## THE POWER OF STEEL

### CSM CABINET COLLECTION

Renowned for structural integrity, purposeful design and our company's commitment to a sustainable environment CSM designs superior products that co-exist for a better world.

At CSM, we understand the power of steel – the most-recycled material on earth. More steel is recycled every year than paper, glass, aluminium and plastic combined, meaning steel has the ability to leave a positive and long-lasting environmental impact. Our product stewardship commitment to zero-waste and non-toxic chemical use means that all CSM products are designed to be 100 per cent recycled. Everyday, we see the power of harnessing steel's recyclable potential to make real change. It gives us the backing to integrate each arm of our business to close the loop on waste.

Our cabinets and unique storage solutions are manufactured to your specifications in our Australian factory. With a diverse range of Australian-made lockers and storage solutions, there are no material or shipping delays.

For over 30 years we have been providing lockers and storage solutions for a diverse range of government departments, education and workplace environments.

## DIVERSE SOLUTIONS

### CSM CABINET COLLECTION

CSM manufacture Australia's largest range of commercial-grade storage cabinets, crafted with future-proofed design.

Our modular range includes endless options. From Retractable or Hinge door cabinets to Lateral and Flipper door units to the timeless Tambour cabinets, all CSM Cabinets are fully lockable, safeguarding valued items and documents.

With an extensive range of cabinets including open bookcases, recycling stations, touch-less recycling units and hide-away waste units. CSM's collection offer a hygienic and waste-conscious solution for progressive workplaces.

Accommodating various uses along with Galleries and Museums, CSM's Plan cabinets are crafted to house plans and precious documents of varying sizes. The Collection Cabinets range are suited to store delicate artwork and fragile materials whilst our media cabinets are available in a choice of horizontal or vertical. If highest security is a key consideration factor, our range includes B & C Class Cabinets or specialty Taser Cabinet for specifically designed for the law enforcement.

All cabinets come in a variety of sizes to increase the amount of functional storage space.

# SUSTAINABILITY

MADE TO LAST A LIFETIME

At CSM, we understand the power of steel – the most-recycled material on earth. More steel is recycled every year than paper, glass, aluminium and plastic combined, meaning steel has the ability to leave a positive and long-lasting environmental impact. Our product stewardship commitment to zero-waste and non-toxic chemical use means that all CSM products are designed to be 100 per cent recycled. Everyday, we see the power of harnessing steel’s recyclable potential to make real change. It gives us the backing to integrate each arm of our business to close the loop on waste.

The sustainable management of all on-site production, freighting and installation processes underpin CSM’s successful performance in frequent environmental audits.

As part of CSM’s corporate social responsibility commitments, we champion local talent, working with Indigenous artists and community workshops. CSM and its suppliers proudly employ the following standards with integrity across arms of business:

- Recycle materials on site
- Employ energy saving lighting
- Water is not used in production processes and any waste water is recycled
- Operating under a zero-emission policy
- Exclude all harmful chemicals from the production process
- Remove all packaging from site for recycling

Most importantly our commitment to high quality materials ensures our products are robust and made to last a lifetime.

CSM’s lead-by-example approach has been awarded with GECA’s Good Environmental Choice Label and Ecospecifier endorsement for the supply of eco-preferable products in Australia, Asia-Pacific and the Middle East. CSM products carry accreditation under the ISO 14000 series.

CSM is also a member of the Green Building Council of Australia – part of the World Green Building Council – and has proudly participated in Australia’s highest green star rated commercial fit-outs, supplying green rated storage systems.

# OUR STORY

## ABOUT CSM

65 years of experience means that CSM is a brand that Australia trusts. We take pride in our long term relationships and work with the country's leading corporate and professional services, government bodies, education providers and cultural organisations – designing products to support innovative Australians and delivering storage solutions engineered to perform today and well into the future.

We started as a design focused business in the 1950s, and we continue to honour the ethos with a commitment to Australia's manufacturing sector – becoming a leading manufacturer of corporate, institutional, campus and conservation storage solutions. We pioneered computer controlled machinery in the 70s and remain at the forefront of Australia's fully automated fabrication facilities.

As a proudly Australian-made, owned and operated company, CSM recognises the value of concentrating operations at a local level.

Recognised for our work in steel, we have become Australia's go-to leading specialists in workplace storage design, engineering and manufacturing solutions tailored to specific design outcomes and budgets, delivered nationally under competitive lead times.

By keeping our design, engineering and manufacture capabilities under one roof, CSM's vertically integrated business model allows for:

- Reduced lead times
- Rapid prototyping capacity
- Exhaustive custom offering
- New product development built to client specification

“Over the past 65 years, we’ve built trust with government and corporate clients along with a demonstrated ability to deliver large scale projects within the property industry. We are contract suppliers for the government with 25+ years of successful delivery for the education and public sectors.

Renowned for our work with high quality steel, we are proud to be Australia's specialised Architectural Storage Solutions provider utilising the power of steel – the most-recycled material on earth and leaving a positive and long lasting environmental impact.

Our success has been underpinned by our commitment to continuous improvement through innovation and technology.”

– Mark Durrington & Peter Letton, Co Managing Directors
