## SELF BASED ROLLING STORAGE – MECHANICAL ASSIST

---

### Features

- Australian designed, engineered and manufactured
- Units are fully modular and can be easily relocated and extended
- Wide range of Standard sizes – Custom sizes available for individual applications
- Designed for single and multiple bay applications up to 2400mm wide
- Ideal for all floor surface regardless of variable levels
- Base sits on floor - No cutting into carpet or floor required
- Positive Drive System via concealed engineered chain and gear system
- Integrated Anti-Tilt with fail safe aluminium (not PVC) safety mechanism
- Rolled post construction for strength and not restricted access
- Back panels cover conceal exposed fittings for streamline office aesthetics
- Distributes loads evenly
- Barrel Exchange Master Key System
- Advanced levels of security available with SCEC endorsed B and C Class locking systems
- Additional locks and CSM storage Pods may be incorporated to provide individual security requirements
- Decorative end dress panels cover the entry side to provide an aesthetically pleasing and contemporary feel.  
A decorative end cover panel to the wall side is optional and normally specified where aisle access is required from both sides
- Standard Decorative end panels are made of powder coated steel in a choice over 200 colours
- Panels may be ordered in the client's choice of perforations, vinyl, laminate or have a mirror finish
