# School Lockers

1 Door    2 Doors    3 Doors    4 Doors

**CSM School Locker systems are pre-constructed for ease of installation, providing a cost-efficient solution for your organisation's needs. Available in 1 door, 2 door, 3 door and 4 door modules, configure CSM School Lockers for your unique team requirements.**

Their steel and rivet construction and powder-coat finish guarantee a long life. With vast internal space, with hanging rail and in-built plinth, there is plenty of room to store large bags, tools and equipment. As standard, they come with ventilation holes in the doors and two locking options – keylock or padlock. The ergonomics of the single door locker has 3 point locking and comes with a recessed handle and lock for greater security.

CSM School Lockers can be specified with extra shelves and hanging rails, alpha-numeric labelling and identification plates.
