# Architectural Storage Solutions for a changing world.

## Capability Statement—Education

### 2023

Sustainable storage solutions for a changing world.

## About Us

CONSISTENTLY SUPERIOR MANUFACTURING

**At CSM we are a trusted supplier of government furniture, we have worked with educators to design, manufacture and install storage for active learning spaces for over 30 years.**

We have specialised in the design, manufacture, customisation, installation and recycling of steel storage systems of the highest quality in the country.

CSM's made-to-measure approach ensures our clients receive a tailored solution unique to their storage needs from shared, individual and end of trip facilities mix in commercial settings, to large scale storage and conservation in the museum sector, accessible, safe and youth-friendly storage for education environments, and security-focused solutions for government organisations coast-to-coast and far beyond.

Our collection of proprietary storage solutions – backed by our manufacturing expertise and durability quality assurance – have been specified in offices, schools, universities, libraries, hospitals, museums and government institutions for generations. Our product stewardship commitment and re-and upcycling knowhow means our steel filing and storage solutions will also be enjoyed for generations to come.

It's the CSM promise...always has been.

## Our Story

65 YEARS IN THE MAKING

65 years of experience means that CSM is a brand that Australia trusts. We take pride in our long term relationships and work with the country's leading corporate and professional services, government bodies, education providers and cultural organisations – designing products to support innovative Australians and delivering storage solutions engineered to perform today and well into the future.

We started as a design focused business in the 1950s, and we continue to honour the ethos with a commitment to Australia's manufacturing sector – becoming a leading manufacturer of corporate, institutional, campus and conservation storage solutions. We pioneered computer controlled machinery in the 70s and remain at the forefront of Australia's fully automated fabrication facilities.

As a proudly Australian-made, owned and operated company, CSM recognises the value of concentrating operations at a local level. Recognised for our work in steel, we have become Australia's go-to leading specialists in workplace storage design, engineering and manufacturing solutions tailored to specific design outcomes and budgets, delivered nationally under competitive lead times.

By keeping our design, engineering and manufacture capabilities under one roof, CSM's vertically integrated business model allows for:

- Reduced lead times
- Rapid prototyping capacity
- Exhaustive custom offering
- New product development

“Over the past 65 years, we've built trust with government and corporate clients along with a demonstrated ability to deliver large scale projects within the property industry. We are contract suppliers for the government with 25+ years of successful delivery for the education and public sectors.

Renowned for our work with high quality steel, we are proud to be Australia's specialised Architectural Storage Solutions provider utilising the power of steel – the most-recycled material on earth and leaving a positive and long lasting environmental impact.

Our success has been underpinned by our commitment to continuous improvement through innovation and technology.”

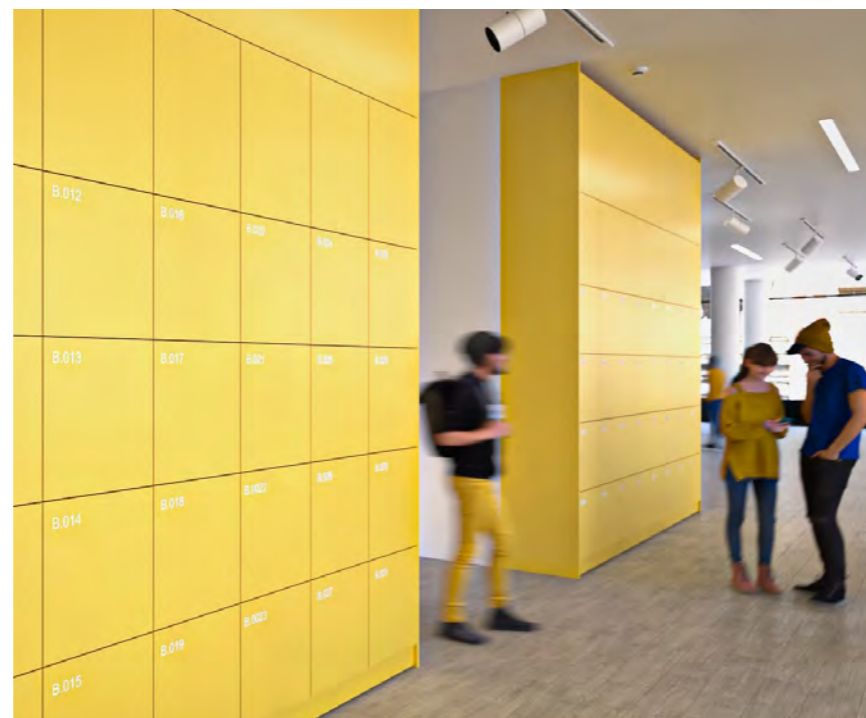

– Mark Durrington & Peter Letton, Co Managing Directors

## Our Products

ARCHITECTURAL STORAGE SOLUTIONS

Renowned for structural integrity, purposeful design and our company's commitment to a sustainable environment our product range provides

Whether you require durable products for high usage areas or effective space saving solutions for student art, materials and books and uniforms, all CSM products are Australian made, hand finished and welded for strength. What's more, we're ISO 9001, ISO14001 and GECA Level A certified and a NSW Government Preferred Supplier so you can trust that no compromises have been taken with our products.

Our products can be seen across both Government Departments and the private sector. And the range is endless. Form with function that further enhances the aesthetics of working spaces.

CSM designs superior products that co-exist for a better world. Our products are interchangeable to fit with existing ranges. All with accessories to match ... and diverse colour range to further customise your space.

Campus Lockers—Student & Faculty

Customised Storage—Art, Sports, Music, Engineering, Uniforms, Office

Office / Back Of House

Cabinet Solutions—Tambours, Flipper, Hinge Door, Lateral Draw Cabinets

Desk Pedestals & Workstation Towers

Flexible Wall Storage—Library, Uniforms, Storage

# Sustainability

MADE TO LAST A LIFETIME

At CSM, we understand the power of steel – the most-recycled material on earth. More steel is recycled every year than paper, glass, aluminium and plastic combined, meaning steel has the ability to leave a positive and long-lasting environmental impact. Our product stewardship commitment to zero-waste and non-toxic chemical use means that all CSM products are designed to be 100 per cent recycled. Everyday, we see the power of harnessing steel’s recyclable potential to make real change. It gives us the backing to integrate each arm of our business to close the loop on waste.

The sustainable management of all on-site production, freighting and installation processes underpin CSM’s successful performance in frequent environmental audits. As part of CSM’s corporate social responsibility commitments, we champion local talent, working with Indigenous artists and community workshops.

CSM and its suppliers proudly employ the following standards with integrity across arms of business:

- Recycle all materials on site
- Employ Energy saving lighting
- Recycle all waste rain and grey water
- Eliminate water use from all production processes
- Operate under a zero-emission policy
- Substitute all harmful chemicals in the production processes with environmentally and worker friendly green options
- Remove single use packaging material from all processes.

Most importantly our commitment to high quality materials ensures our products are robust and made to last a lifetime.

CSM’s lead-by-example approach has been awarded with GECA’s Good Environmental Choice Label and Ecospecifier endorsement for the supply of eco-preferable products in Australia, Asia-Pacific and the Middle East. CSM products carry accreditation under the ISO 14000 series.

CSM is also a member of the Green Building Council of Australia – part of the World Green Building Council – and has proudly participated in Australia’s highest green star rated commercial fit-outs, supplying green rated storage systems.

# Our Expertise

SCHOOLS, UNIVERSITIES, EDUCATION & LEARNING SPACES

As the trusted business partner CSM has supplied more than 50,000 clients nationally. We are a trusted supplier of government furniture and have worked with educators to design, manufacture and install storage for active learning spaces for over 30 years.

We are School and Education Storage specialists and have worked with dozens of institutions to provide smarter, future-forward and safer storage solutions.

**Mosman High School designed by Woods Bagot**  
Featuring Work Aisles, Work Bars, System Shelving and Filing Cabinets.

**Illawarra Public School**  
Featuring CSM Student Art Storage, Rolling Storage, Hanging Art and Art Stock Storage Drawers.

**Moore College designed by Geyer**  
Featuring CSM Library Shelving, Rolling Storage and Systems Shelving.

**Meadow Bank Education and Employment Precinct designed by Woods Bagot**  
Featuring CSM Student Lockers, School Lockers and Change room Lockers.

**UNSW Electrical Engineering Building, Faculty Storage, Bio Sciences Building & The Red Centre**  
Featuring CSM Faculty Storage, Workstation Towers, Campus Lockers, Students and Teacher Lockers, Rolling Storage, Tambour Cabinets and Custom Design Storage for Engineering Materials and Tooling.

**Redlands Cremorne designed by TKD Architects**  
Featuring CSM Art Storage, Till cabinets, Plan Cabinets and Shelving.

**Western Sydney University (WSU) designed by Woods Bagot**  
Featuring Faculty Storage, Workstations Towers, Lateral Draw Cabinets and Pedestals.

# CASE STUDY — EDUCATION

MOORE COLLEGE / LIBRARY

Since 1856 the academic institution, Moore College has been providing in-depth theological training and is a hub for international learning. As the College expands so too has the growth of its library, which is the largest theological library in the Southern Hemisphere.

Located on King Street, Newtown the library is the heart of the College.

The brief was to provide accessible storage, with the ability to accommodate an increasing collection. The new library has the capacity to hold 90,000 titles and will house a Digital repository of over 5,500 items. The purpose built space was designed to showcase the latest in innovative design. Dark spaces were redesigned to give way to natural light, small uninviting study areas were replaced by larger and versatile spaces that accommodate more students. Dedicated areas were created within the library where students can access technology, reference materials including multi-media and audio-visual equipment and be supported by staff.

Partnering with Kane Constructions, and designers Geyer and Allen Jack+Cottier Architects, CSM successfully delivered the focal high density Rolling Storage system, together with the Library Shelving. Students and visitors are inspired by the Mechanically Assisted Fixed Track Rolling Storage Unit, which was finished in Citrus Yellow Gold Gloss.

## CASE STUDY – MEADOW BANK

MEADOW BANK / EDUCATION & EMPLOYMENT PRECINCT

CSM has established itself as a leading education supplier, having worked with most of Australia's largest academic institutions. CSM applies the same unique practical logic for cost effective space saving ideas for student art, materials and books, uniform and space saving equipment, to heavy duty and dedicated storage of field equipment, precision instruments, samples and specimens, and research products in universities and research facilities.

The Meadowbank Education and Employment Precinct is a prime example of this. Meadowbank Public School and Marsden High School were relocated to the Meadowbank Education and Employment Precinct. A leading education precinct that housing the Meadowbank Public School and Marsden High School to create a responsive learning environment that is responsive to educational, economic and environmental conditions and requirements.

Focused on future innovation, the precinct caters for 1,000 primary school students, 1,500 secondary school students and a further 120 Intensive English Centre students.

The new purpose-built facilities designed by Woods Bagot house the separate primary school and high school in multilevel, multi-purpose buildings with play spaces and landscaped areas. Side by side, the schools form a connected education community, supporting students to achieve their potential throughout their school years.

CSM was proud to work with the project team at Winc to provide the Office Lockers, End Of Trip Lockers, Lateral Cabinets and filing cabinets. All manufactured from Australian steel and finished in Green and Dark Teal.

# CASE STUDY – REDLANDS

REDLANDS / PRESCHOOL TO YEAR 12 COEDUCATIONAL SCHOOL

CSM designed a tailored suite of storage solutions as a direct response to Redlands' need to support innovative and collaborative learning, both now and in the future. CSM worked closely with both Redlands and TKD Architects. The brief was to increase storage space in existing spaces that was functional yet visually appealing for student and teaching staff across various rooms.

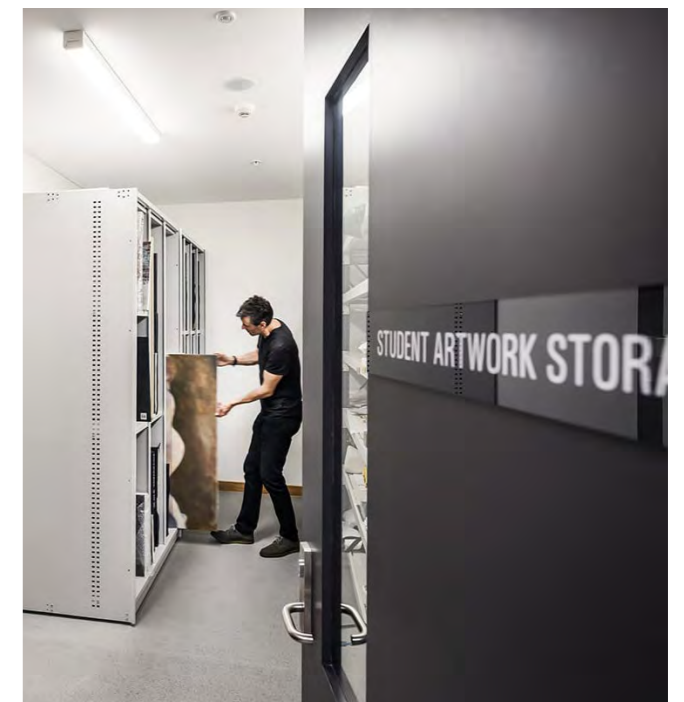

CSM Paper and Art Store Cabinets with mobile castor wheel kits were supplied to easily access oversized art paper and to allow flexibility within the space as needs change over time. The units were double stacked to maximise the storage and minimise the floor foot print.

Joinery open Bookcases were supplied by CSM. A combination of low height bookcases to house easily accessible items such as photocopier paper and tall height bookcases for resource material were incorporated.

CSM's Art Work Till Cabinets featured wide compartments with a mixture of custom vertical divider rods and full side panels for smaller artwork and reference materials. This flexible solution allows safe storage of student artworks providing protection from damage

The scope of works also included supply of a secure Camera Storage Cabinet with allowance for charging facilities. Colour Dulux Oyster Grey was chosen to complement elements of the learning hub.

We are proud to be part of a project that will contribute to a high-quality on-campus experience, making a positive impact on learning outcomes for one of Sydney's leading independent schools.

## Why CSM?

ARCHITECTURAL STORAGE SOLUTIONS

We are committed to local manufacturing and are Australia's only manufacturer of commercial and industrial architectural storage systems with a specialised focus on technical innovation, product flexibility and quality.

With a local mindset, CSM has achieved significant sustainable outcomes: supporting the economies, communities and collaborators on our doorstep, and operating at a variety of inventory scales to minimise freight, lead times, waste and harmful impacts on the environment. Powered by our engineering and design expertise, the CSM team works to perfect design customisation and production detailing to create durable, tomorrow-ready products.

- High quality Australian design and manufacturing
- Modular and reconfigurable products
- Effortless maintenance
